1. About Company

Since 2012, OOO "Pervaya Proizvodstvennaya Korporatsiya" has been developing and producing personal and collective protective equipment to prevent or reduce the impact of environmental corrosive factors in emergency situations, at work, as well as to protect workers and employees from industrial pollution.

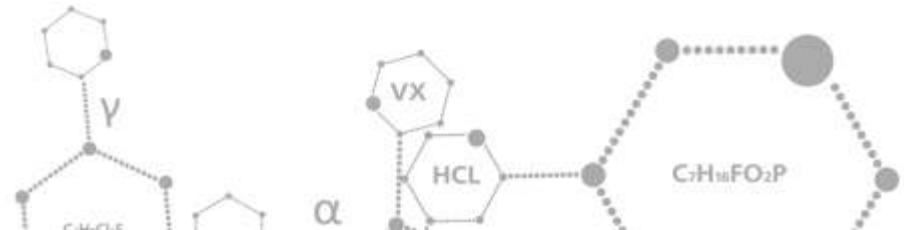
"PPK" is a team of experts aimed at the continuous improvement of the manufactured protective equipment. Today we are among the leaders in this field, and in the field of individual developments we are the only producer in the country.

Our products are considered to be one of the best in Russia and the near abroad and are in demand in several dozens of industries and services.

Our target audience includes the military, oil industry workers, gas workers, employees of municipal and city services, employees of hazardous or toxic industries.

Our regular customers include the Ministry of Internal Affairs of Russia, the Ministry of Emergency Situations, oil companies, mining, oil and gas producing companies, gas rescue units, construction companies and plants with hazardous working conditions.

The engineering and special equipment manufactured at "PPK" is also used in the construction of bomb shelters (civil defense) and other premises of the same or general protective purpose.



1.1. Our Mission, Objectives and Goals

The main priorities of the company:

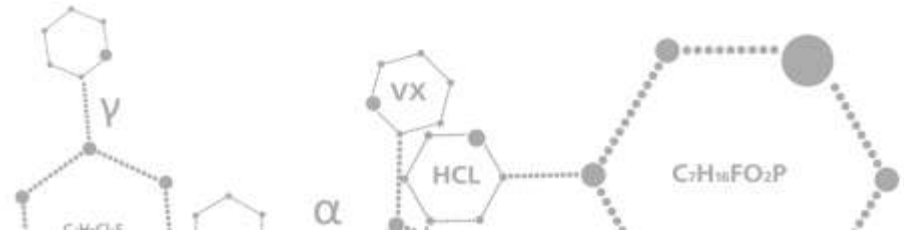
- To fill the market of personal and collective protective equipment with high quality products;
- To develop new products to protect people from toxic and emergency hazardous chemicals.

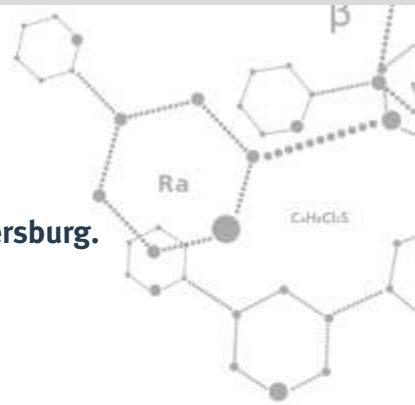
Our main objectives:

- Production of innovative products for industry and population
- Regular renewal of the range of PPE and CPE
- Expansion of the company's target market
- Improvement of customer service
- Ensuring strict control over the compliance of products with all standards a nd regulations
- Analysis and detection of imperfections and their subsequent modernization in the protective equipment

Our goals consist in the following:

- To provide any services and works with reliable PPE for creating safe working conditions;
- To provide the military, rescue workers, workers and employees with protective clothing of best protective qualities;
- To take the company into the international market with products that are not inferior to global brands.





1.2. Advantages

We are a large and responsible manufacturer with our own base in St. Petersburg. “PPK” has:

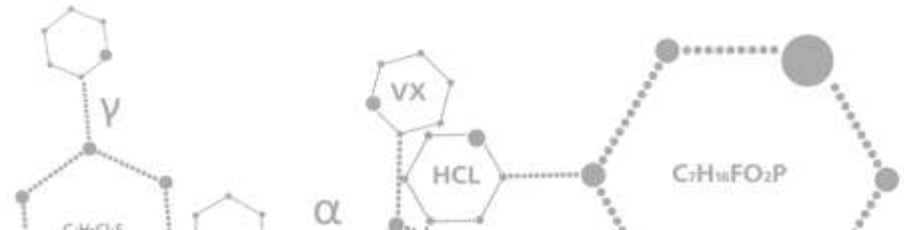
- A large range of PPE and CPE products;
- Modern equipment;
- Possibilities for regular renewal of the range and development of techniques, manufacturing accessory, equipment;
- Reliable Russian suppliers;
- Responsible management and quality control department team;
- Skillful and competent staff.

1.3 Our Work with the Client Base of Customers

When contacting OOO “Pervaya Proizvodstvennaya Korporatsiya”, each client can figure on **an individual approach** for the effective execution of their order.

A wide range of our PPE and CPE is regularly replenished with new products. This will make it possible for each customer to find the ready-made solution that is necessary for them.
We can also offer manufacturing or development of solutions according to calculations, drawings or model versions and dimensions of our customers.

All our products **are certified and comply with established international and national standards**.



1.4 Liability

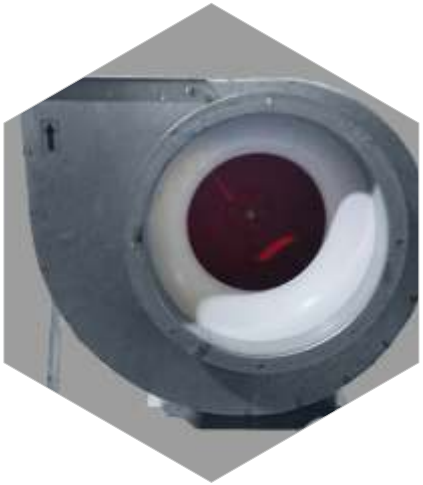
As a reliable manufacturer, we guarantee:

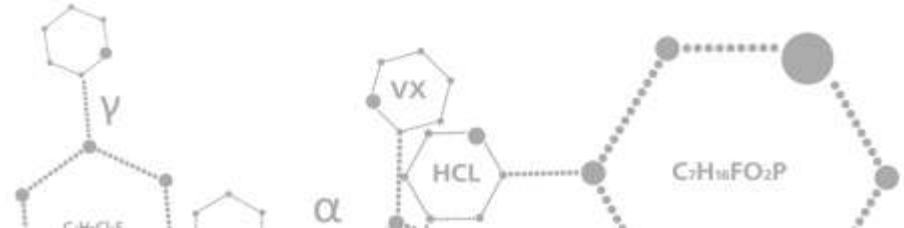
- Compliance with the terms and volumes of deliveries of ordered products;
- High level of customer service;
- Immutability of the standard for the quality of products.

“PPK” supplies only quality products that:

- Are made with the use of the most modern equipment;
- Passed an in-plant multi-stage quality control and final testing.

We always stand for mutually beneficial long-term cooperation which can be achieved through high service and attentive attitude to the tasks of each of our clients.

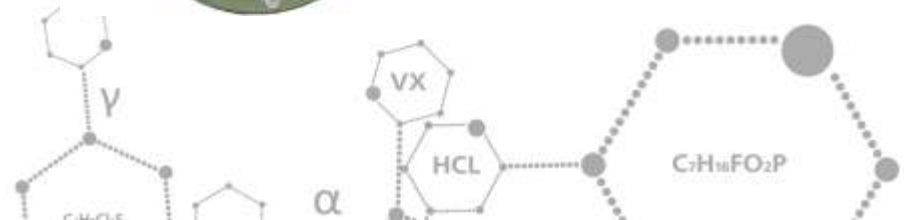




2. Products

Our products are designed to serve the purpose of:

- Protection from emergency chemically hazardous substances, radioactive dust, toxic agents, viruses – special equipment and protective clothing
- Chemical protection – special equipment, clothing and mass PPE
- Professional personal protection (water, dirt, grease, oil, etc.) – special equipment and mass PPE
- Collective protection – special equipment, engineering equipment and mass CPE



2.1. Personal Protective Equipment

This is the product mix of PPE which includes protective suits protecting from the exposure to hazardous environments, chemicals and water; aprons; oversleeves; signal vests.

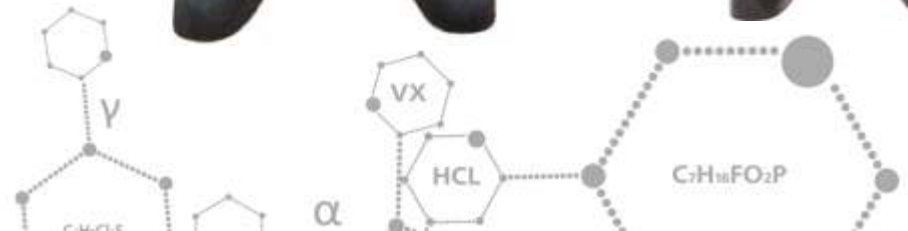
Protection Against Hazardous Substances

These are accessories and protective clothing in the categories: chemically hazardous substances, radioactive dust, toxic agents, viruses

Purpose: protection from radioactive, biological, toxic substances, hazardous chemical compounds (acids, alkalis, etc.)

Range of products:

- Suits (trousers + jackets with hoods)
- Overalls
- Environmental suit
- Waterproof coats



Complete set:

- Gas masks
- Masks
- Boots
- Gloves
- Stockings
- A bag

Materials:

- T15
- T15К UNKL 3
- UNKL 3К
- PVC double-sided coating

Chemical Non-Conductive Suits

These are accessories and protective clothing in the categories: КІН, КІН-Р-КІО

Purpose: protection in hazardous conditions of exposure to toxic substances.

Types: open and closed.

Specificity: full external sealing, multiple use.

Range of products:

- Overalls with a stitched hood

Complete set:

- Breathing apparatus
- Gas masks
- Boots
- Gloves
- A bag
- A backpack under the suit (for cylinders)

Materials:

- T15
- T15К UNKL 3
- UNKL 3К
- PVC double-sided coating

Water Protection

Protective clothing in the dampproof category.

Specificity: are not non-conductive.

Range of products:

- Semi-overalls
- Jackets
- Trousers
- Raincoats

Complete set:

- Boots (sewn with semi-overalls)
- A bag

Materials:

- PVC
- Rubberized LNG
- T15
- UNKL

Aprons

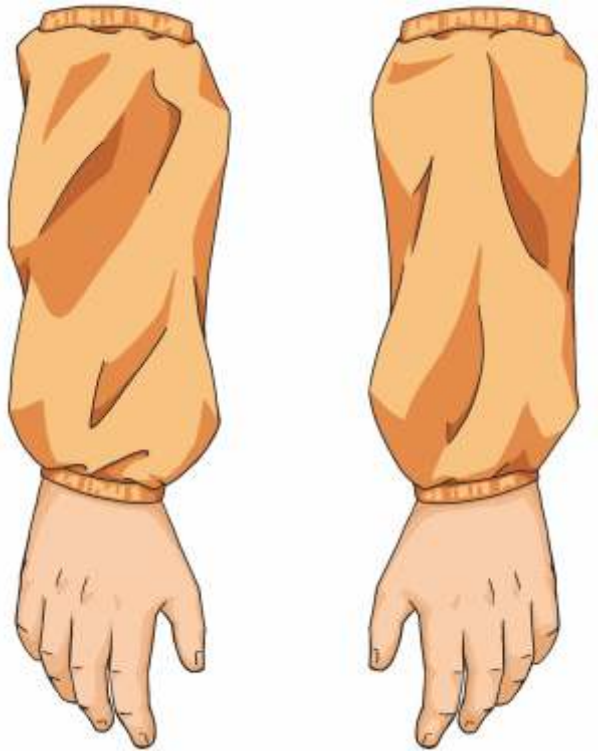
Protective clothing categories – acid and alkali-resistant, food, medical

Types:

- A (front)
- B (+ side zones),
- Apron-coat (with sleeves, high collar and adjustable fast-clasp)

Material:

- Rubberized fabric
- PVC



Oversleeves

Categories - acid and alkali-resistant, medical, for the food industry

Types: A (up to 45 cm), B (60 cm)

Models:

- Double-sided rubber bands, conical
- With fixed thumb loop

Materials:

- Rubberized fabric
- PVC

Signal Vests

Protective clothing category of high visibility

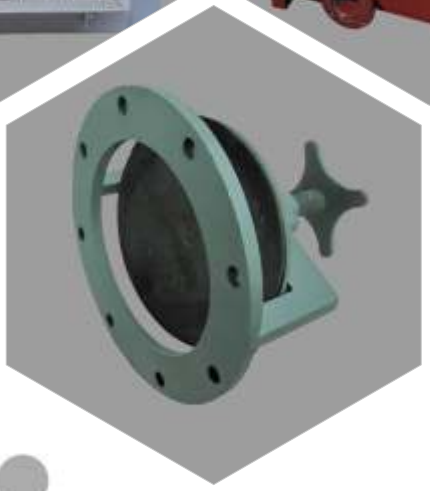
Class: 2 и 3

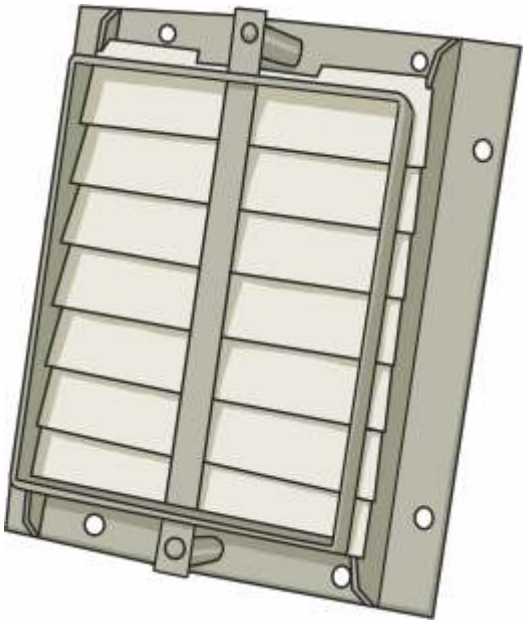
Materials:

- Polyester 100%

2.3. Collective Protection Equipment

Collective protection equipment which includes ventilation units, devices and components for ventilation systems; equipment for sewer, energy systems and water supply





Protective and Protective-Hermetic Products for Civil Defense Protective Facilities

Equipment providing protection and tightness of entrances/exits, windows and other openings in rooms.

Our range of products:

- **Doors:** protective and hermetic
- **Valves** flow meters (KRO-1, KRO-2, R-49), valve hermetically dual GK-2-100
- **Anti-explosion sections** (MZS, UZS)
- **Boxes:** MZ, UZ
- **Shutters:** : hermetic, protective-hermetic, swing
- **Flashboxes:** RK-0,5, RK 2-I, RK 2-II

Plank Beds Special for Shelters

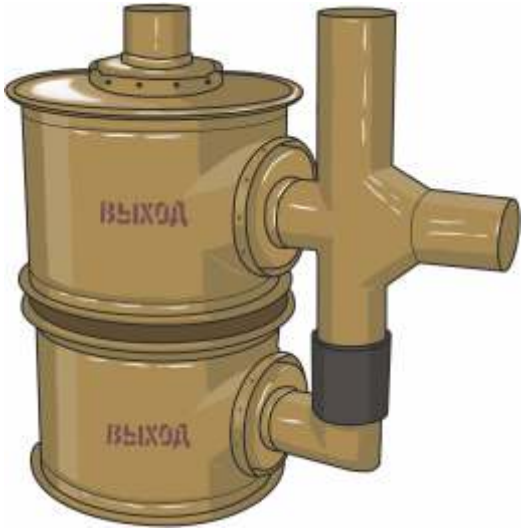
Designed for long stay of people

Products of the categories:

- **Metal, wood**
- **Types:** collapsible, stationary, unified
- **Tiers:** from 1 to 3

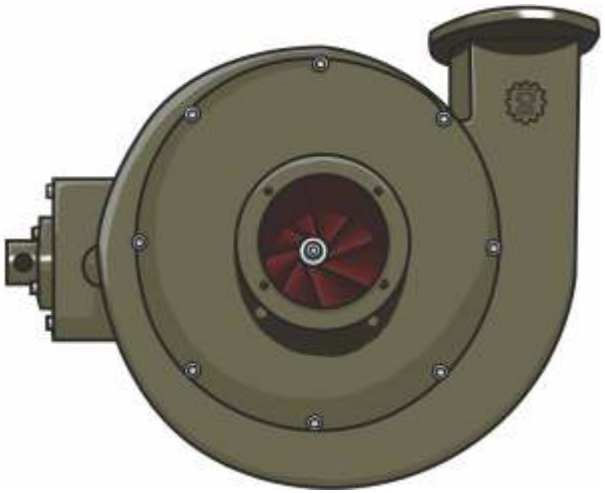
Complete set:

- Decks with mattresses, heads of the bed (lifting and folding)



Mounting Parts

- **Products for** FP- 300, FPU-200, RP-100



Ventilation Units, Devices and Products for Ventilation Systems of Civil Defense Protective Facilities

- **Electro-manual installation** ERV-72-2, ERV - 72-3
- **Electro-manual fans** ERV- 49, ERV - 660/300

Engineering Equipment for Water Supply, Sewerage and Energy Supply Systems for Civil Defense Protective Facilities

The equipment is intended for maintenance of civil defense shelter systems.

Range of Products:

- **Gravity tanks** (capacity from 0.1 to 10)
- **Tanks** of different capacity for fuel (diesel) – 0,3-1, 4
- **Portable** inventory tanks
- **Tanks** MSB 1 and MSB 2 sectional fecal (special)

Environmental Control Kits Weather Kit MK-3

Designed to equip weather stations and environmental monitoring tasks

Complete set:

- МК-3В
- МК-3А

Sampling Kit KPO-1M

A set of items and accessories for contactless sampling at a contaminated facility

Safe samples:

- Soil
- Granular materials
- Liquids
- Surfaces

2.5. Our Development and Production

OOO “Pervaya Proizvodstvennaya Korporatsiya” is engaged in its own development of PPE models, elements and techniques for their manufacture.

- Glove bayonet connection
- Air inflating valve for non-conductive suits (under the suit)
- Boot ring fastening to protective clothing of different types

The company plans to further improve our models and special equipment for PPE, as well as optimize and modernize the facilities and equipment for CPE.
